

Two sided printed is required

This is the image for the FRONT side

Print on THIN (1/10mm) paper

ThinPaper

Front-To-Back registration based on the sheets being printed in the center of the page.

18e Lifeboat Cover

23b with coaming 1/10mm

12b,c Antenna loops 1/10mm
Form a ring, then trim off two "ring slivers"

inchXcm

21d Anchor Winch housing skin

Rudder skin 1/10 mm

58 Overhead Lights

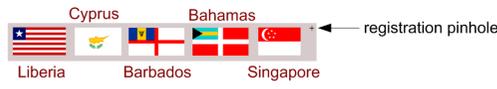

Cut out;
soak;
place on mouse-pad;
push down with any convex tip to make concave;
let dry

Make tiny spit-wads
Pick the best formed/sized as lightbulbs

See pictures for placement

Registry Flags

- The flags need accurate registration between front and back. So the flags are printed 5 times. Once with perfect registration and four more times with registration that is off slightly.
- After printing, push a needle through each of the 5 registration pinholes and see how well each aligns with the mark on the back.
- Pick a flag from the copy that comes closest
